RENOVATIONS COMMENCE TO AUGMENT SERVICES PROVIDED TO VETERANS IN ADULT DAY HEALTH CARE PROGRAM

On December 28th, renovation/asbestos abatement began in the Recreation Therapy room/Bowling Alley located in the basement of building #5. This modification is necessary for the upcoming transition and movement of the Onsite Adult Day Health Care program from building #36.

The estimated duration for the asbestos abatement is 30 days.

During the abatement, the recreation room will be temporarily unavailable due to the renovation and safety requirements.

The bowling alleys and recreation therapy room will remain fully functional following the conclusion of this transition.

Upon completion of all necessary renovations, the new area will provide additional opportunities and improved access as well as better meet the needs of the Veterans served in the Adult Day Health Care program as well as those who utilize these Recreation services.
